SUMMARY

Established software developer with expertise in interactive educational software, virtual reality, and mobile development. familiar with Unity, React, and SQL. Oversaw teams that produced engaging projects like procedural 2D platform games, VR/AR experiences, and GPS-based features. Adept at creating excellent, user-centred solutions while encouraging teamwork and mentoring engineers.

EXPERIENCE

Full Stack Developer

February 2023 – Current

D&D Skunkworks

- Created a learning tool that uses technologies like React, LMS, Unity, and MySQL to let teachers, students, and administrators develop and play interactive games focused on math and language.
- Led the creation of an interactive 3D medical device visualization tool that lets users create and animate their own instructional guides with changing colors to show how the device works inside.
- Spearheaded the development of a government-sponsored VR application using Unity that allowed students or other individuals to go through Learning modules and be tested on situational environmental hazards of given environments
- Worked with other developers to come up with ideas and learn more about current features, and taught and shared knowledge with newer and less experienced developers

Software Engineer

May 2021 – January 2023

ePlay Digital

- Designed an unboxing feature in a mobile application that allowed users to experience a loot unboxing in augmented reality or within the app
- Created a feature that uses 3D map technology and GPS coordinates from external or internal datasets which allows users to visualize their movements in a mobile application using Unity
- Created a series of pet-related components that let users purchase, and interact with their dogs in both a virtual and augmented reality

Lead Game Developer - Co-Creator

January 2021 – January 2022

4NZ Games

- Engineered a multilevel story-based 2D procedurally generated platform game using Unity and external tools
- Led and managed a team of developers, including assigning tasks, providing guidance and support, conducting performance evaluations, and fostering a collaborative work environment.
- Conduct regular testing and debugging to identify and resolve issues and ensure a smooth gameplay experience

EDUCATION

Sheridan College

Oakville, Ontario

- Advanced Diploma in Software Development and Network Engineering
